CO-MODECO MAN - WOMAN

You are design-conscious - conservation minded - builders institutions , governments and home owners who appreciate style, efficiency and low energy options to traditional wasteful and costly stick building.

Build Back Better for the 21st Century.

future
friendly

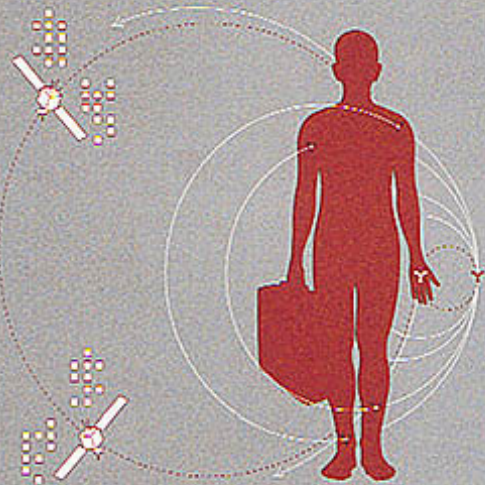

States Compact Modular Eco Home Co-Founder Holmes Stoner Jr., "After year's of research, sourcing and development, our compact eco-friendly homes and commercial spaces are set to arrive at the Port of Miami, Florida by December 2022.

Constructed of cold pressed steel framework, and environmentally friendly materials, our first quality habitats include walls, ceilings, electrical wiring, window and door openings, are pre plumbed and are ready for the 'Welcome Mat' within days not months!

Our Co-Modeco habitats adapt easily to mixed use communities, commercial and residential developments, resort residences, emergency and work force housing. We build better for the 21st Century by manufacturing safe, affordable, sustainable, and indestructible dwellings, smart homes and commercial spaces!

We currently have 20,000 units on standby for immediate delivery!

Co-Modeco Homes are Eco-nomical
Indestructible - Adabtable - Scalable
& Enviornmentally Correct

Modular construction may seem like a newer way to construct buildings, but it actually has a long and storied history. Ever since assembly lines in factories became commonplace, architects and builders have sought to utilize their potential to create high-quality prefabricated buildings.
